Story point estimate:	3

Description

As a user, after a search is performed, I want to be able to claim the deal from the search results page.

A "View Deal" button is present on each flight result div.
If more than one deal is available on the partner websites, an arrow-down icon is shown near the "View Deal" button. Clicking on the arrow will show the list of the prices from the partner websites.

If the user clicks on the View Deal button, the cheapest offer is selected.
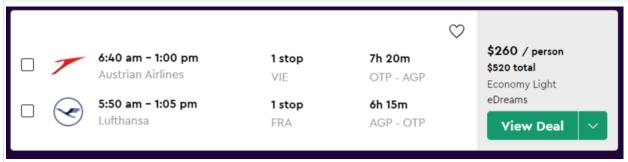

Clicking on any of the View Deal buttons or partner offers drop-down links will redirect the user to the appropriate website where the user can claim the deal.

Design: as present on https://hent.atlassian.net/browse/ICHM-4 .

Acceptance Criteria:

- Every results div has a "View Deal" button
- The "View Deal" button is clickable
- The "View Deal" button is opening a new tab to the partner website
- If more than one partners, the arrow is shown
